

RangeMatch Cattle Operating Snapshot

4213 Nambe Road, Indian Hills, CO 80454
CONDITIONAL · confidence MODERATE

1. Advisor Conclusion

Seasonal grazing reading is open, but livestock-water use is still unverified

With seasonal grazing as the buyer frame, the public evidence still supports only a provisional cattle operating picture. The drink theme remains visible, yet developed drinkers are not established from remote layers. The first spend stays a defined diligence step before a broad ranch tour. Hydrography layers are leads for field inventory, not proof of usable drinkers. Primary constraint: Seasonal demand narrows the operating frame, but usable livestock water and access paper still control whether travel is justified. Confidence is MODERATE; this remains a provisional cattle operating reading.

Constraint: Seasonal demand narrows the operating frame, but usable livestock water and access paper still control whether travel is justified.

2. Why This Conclusion

Feed / Drink / Movement Context

Feed: Public forage context frames attention but does not finish a feed claim.

Basis: Vegetation context leads

Drink: Livestock-water inventory is unavailable from public layers for this parcel.

Basis: Water source unavailable

Movement: Parcel area frames movement scale without inventing grazable acres.

Basis: Parcel area context

3. What Changed

Agent asked: Are you evaluating this property for seasonal grazing or a year-round cow-calf operation?

Buyer answered: SEASONAL GRAZING

Conclusion update: The operating reading changed in confidence, headline, primary_constraint, summary after incorporating the unverified user answer.

Change status: CONCLUSION CHANGED

4. Next Move

Ask whether the seller claims a developed livestock-water system, then keep access paper ahead of travel.

Spend class: REMOTE INFORMATION REQUEST

Q1: Is the seller claiming a developed year-round livestock-water system on this parcel?

Q2: Can you provide the recorded entrance or title basis used to reach this tract?

A named developed-water claim would sharpen whether the next spend is a document request or a narrow field inventory.

5. Evidence Footer

Parcel boundary confirmed. Mireye: parcel entry / context only - not parcel-wide proof.

No stocking-rate, legal-access, or water-right conclusion. Mapped hydrography is not usable livestock water.
